Fitness can be described as a condition that helps us look, feel and do our best. Many people join gym to remain physically fit. This application will help people to get registered and choose the trainer. In this system there are three entity namely Admin, Member and Trainer. Admin can login, Add new members. Admin can also delete the members who left the gym. Admin will add new trainer, Update the information of trainer and delete the trainer. Admin can also modify member's data and trainer's shift. Member can login using credentials and transfer money online. Trainer can login and mark the attendance of the members.

**FOOT STEP POWER
GENERATION** 15 Mar'18 - 15 May'18
In this project we are generating electrical power as non-conventional method by simply walking or running on the foot step. The control mechanism carries the rack&pinion, D.C Generator, battery and inverter control. The generator is coupled to the ply wheel shaft with the help of Spur Gear mechanism. This project was done under Prof. Aniket Maity, Department of Mechanical Engineering, Techno India College of Technology.
